# JEESZ 模块开发文档

以电子商务系统配置管理为实例,手把手教你搭建 jeesz 模块项目

# 1、 创建表

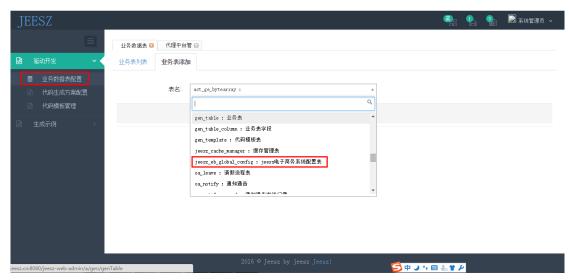

## 1.1、 创建电子商务系统配置 jeesz\_eb\_global\_config 表

```
SET FOREIGN_KEY_CHECKS=0;
-- Table structure for `jeesz_eb_global_config`
DROP TABLE IF EXISTS 'jeesz_eb_global_config';
CREATE TABLE `jeesz_eb_global_config` (
 `id` varchar(64) NOT NULL COMMENT '编号',
 `context_path` varchar(20) DEFAULT NULL COMMENT '部署路径',
 `port` int(11) DEFAULT NULL COMMENT '端口号',
 `treaty` longtext COMMENT '用户协议',
 `activescore` int(11) NOT NULL COMMENT '激活积分',
 `def_img` varchar(255) NOT NULL DEFAULT '/r/eb/u/no_picture.gif' COMMENT '图片不存
在时默认图片',
 `create by` varchar(64) NOT NULL COMMENT '创建者',
 `create_date` datetime NOT NULL COMMENT '创建时间',
 `update_by` varchar(64) NOT NULL COMMENT '更新者',
 `update_date` datetime NOT NULL COMMENT '更新时间',
 `remarks` varchar(255) DEFAULT NULL COMMENT '备注信息',
 `del_flag` char(1) NOT NULL DEFAULT '0' COMMENT '删除标记',
 PRIMARY KEY ('id'),
 KEY `jeesz_eb_global_config` (`del_flag`)
) ENGINE=InnoDB DEFAULT CHARSET=utf8 COMMENT='jeesz 电子商务系统配置表';
-- -----
-- Records of jeesz_eb_global_config
-- -----
注意:
1. 表名的修改
```

2. `create\_by`、`create\_date`、`update\_by`、`update\_date`、`remarks`、`del\_flag` 是不可

#### 缺少的,大家在创建表的时候请勿忽略这些字段。

#### 1.2、 驱动式方案添加业务表配置

点击下一步进行业务表配置(主要针对于 sql 查询条件、页面元素进行设置)

最后进行保存

### 1.3、 生成方案添加

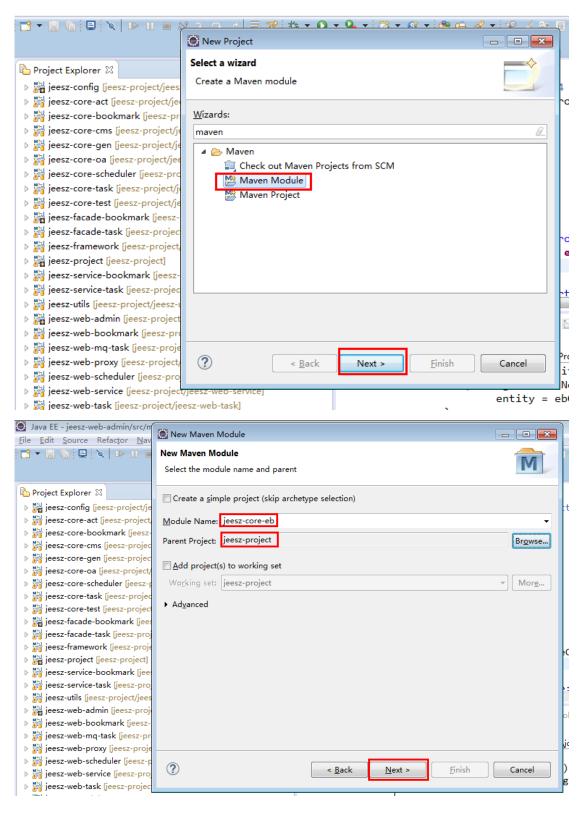

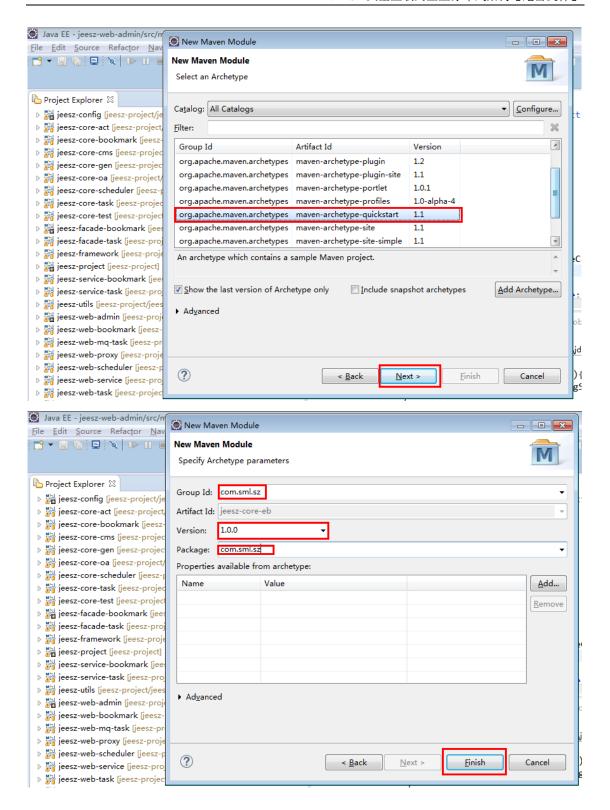

#### 保存并生成代码(我代码生成在 D:/src 目录下)

## 2、 创建模块项目

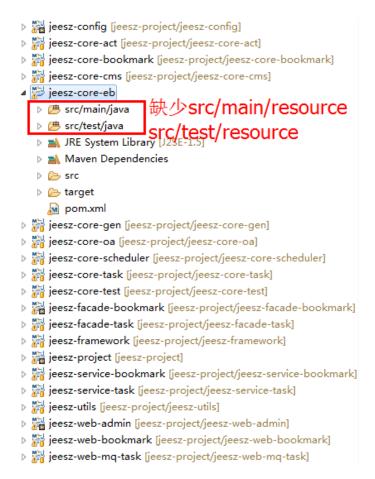

## 2.1、 根据自己的业务创建模块项目(我以 EB 为实例)

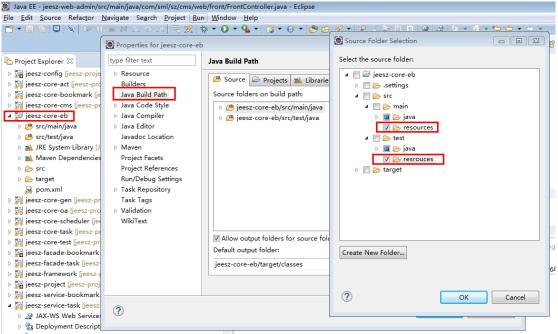

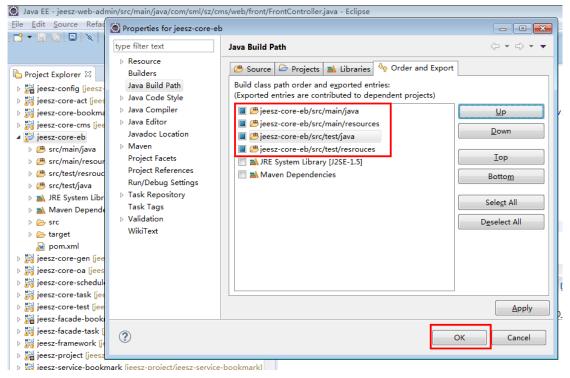

### 2.2、对 module 项目进行修改、配置

因为考虑到项目的完整和一致性,通过工具生成的 maven 项目缺少一些源文件,故需要手动创建如下:

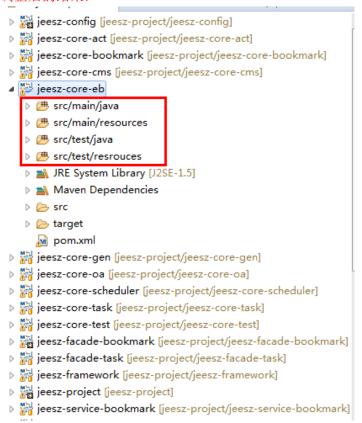

点击 ok 后对新创建的文件目录进行顺序调整:

#### 调整后的结果:

修改模块项目 jeesz-core-eb 的 pom.xml 文件:

```
1 <?xml version="1.0"?>
  29 <project xsi:schemaLocation="http://maven.apache.org/POM/4.0.0 http://maven.
  3
        xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
      <modelVersion>4.0.0</modelVersion>
  4
  5⊖ <parent>
  6
        <groupId>com.sml.sz</groupId>
         <artifactId>jeesz-project</artifactId>
  7
  8
         <version>1.0.0</version>
  9
       </parent>
                                            由于项目继承project,所以删
      <groupId>com.sml.sz</groupId> ◆
       kgroupId>com.smi.sz</ri>
<artifactId>jeesz-core-eb</artifactId>groupid和version</a>
<artifactId>jeesz-core-eb</artifactId>groupid和version</a>
%10
 11
№12
      <version>1.0.0</version>
 13 <name>jeesz-core-eb</name>
 14
      <url>http://maven.apache.org</url>
 15⊖
      cproperties>
 16
        ct.build.sourceEncoding>UTF-8/project.build.sourceEncoding>
 17
       </properties>
 18⊖
      <dependencies>
 19⊝
        <dependency>
          <groupId>junit
 20
          <artifactId>junit</artifactId>
 21
 22
          <version>3.8.1
 23
          <scope>test</scope>
 24
        </dependency>
 25
     </dependencies>
 26 </project>
 27
igeesz-core-eb/pom.xml ⊠
 xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
     <modelVersion>4.0.0</modelVersion>
    <parent>
      <groupId>com.sml.sz
      <artifactId>jeesz-project</artifactId>
      <version>1.0.0
     </parent>
    <artifactId>jeesz-core-eb</artifactId>
 10
 11
    <name>ieesz-core-eb</name>
      (url>http://maven.apache.org</url)
     <description>jeesz的
・ 子高务核心包・所有的业务功能的代码都在里面。代码风格和基类維承jeesz - framework</description>
 14
                                                           为模块添加描述
 15⊖
    concerties>
      cyroject.build.sourceEncoding>UTF-8
 16
     </properties>
 18<sup>⊕</sup> Kdependencies>
         <u>dencies></u>
■可以将jeesz-core-bookmark的dependencies配置copy到eb模块
<!-- <u>alibaba druid</u> connection pool -->
 19
 20⊝
         <dependency>
             <groupId>com.alibaba/groupId
 21
             <artifactId>druid/artifactId>
 23
             <version>${druid.version}</version>
 24
         </dependency>
 25
         <!-- jdbc driver -->
 28
            derounTd>mvsal
具体内容如下:
<dependencies>
         <!-- alibaba druid connection pool -->
        <dependency>
             <groupId>com.alibaba
             <artifactId>druid</artifactId>
             <version>${druid.version}</version>
        </dependency>
```

```
<!-- jdbc driver -->
<dependency>
   <groupId>mysql
   <artifactId>mysql-connector-java</artifactId>
   <version>${mysql.driver.version}</version>
   <scope>runtime</scope>
</dependency>
<dependency>
   <groupId>com.oracle</groupId>
   <artifactId>ojdbc14</artifactId>
   <version>${oracle.driver.version}</version>
   <scope>runtime</scope>
</dependency>
<dependency>
   <groupId>net.sourceforge.jtds
   <artifactId>jtds</artifactId>
   <version>${mssql.driver.version}</version>
   <scope>runtime</scope>
</dependency>
<!-- AOP相关包 -->
<dependency>
   <groupId>org.aspectj</groupId>
   <artifactId>aspectjrt</artifactId>
   <version>1.7.4</version>
</dependency>
<dependency>
   <groupId>org.aspectj</groupId>
   <artifactId>aspectjweaver</artifactId>
   <version>1.7.4</version>
</dependency>
<dependency>
   <groupId>cglib
   <artifactId>cglib</artifactId>
   <version>3.1</version>
</dependency>
<!-- jeesz config begin -->
<!-- 系统公共配置 -->
<dependency>
   <groupId>com.sml.sz
   <artifactId>jeesz-config</artifactId>
</dependency>
<!-- jeesz config end 公共配置 -->
```

## 2.3、将生的代码 copy 到指定目录 com.sml.sz.eb

```
jeesz-config [jeesz-project/jeesz-config]
| jeesz-core-act [jeesz-project/jeesz-core-act]
jeesz-core-bookmark [jeesz-project/jeesz-core-bookmark]
jeesz-core-cms [jeesz-project/jeesz-core-cms]
⊿ 册 dao
        ▶ IP EbGlobalConfigDao.java
        ▶ II EbGlobalConfigService.java
   mappings
      ⊿ 🇁 eb

▼ EbGlobalConfigDao.xml

   src/test/java

⊕ com.sml.sz

  ▶ Æ src/test/resrouces
  ▶ Maven Dependencies
  ▷ 🐎 src
  target
   m pom.xml
```

修改 jeesz-project 的 pom.xml 文件,添加模块依赖

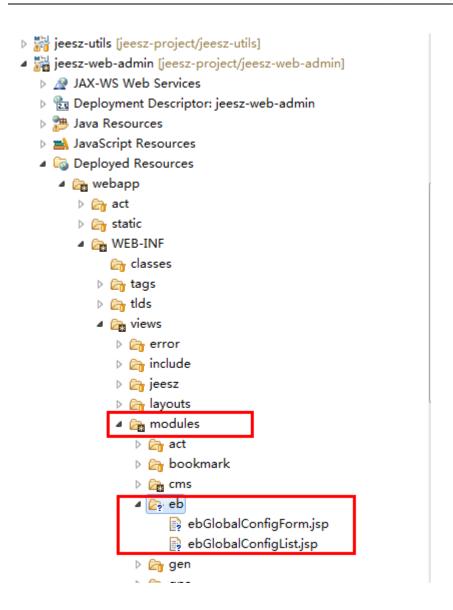

```
📓 jeesz-project/pom.xml 🛭
211
                 </dependency>
212
                 <!-- jeesz 我的收藏Dubbo服务生产者 -->
213⊜
                 <dependency>
214
                     <groupId>com.sml.sz</groupId>
215
                     <artifactId>jeesz-service-bookmark</artifactId>
216
                     <version>${project.version}</version>
217
                 </dependency>
218
                 <!-- JMS消息服务平台 -->
219
                 <dependency>
2209
221
                     <groupId>com.sml.sz
222
                     <artifactId>jeesz-web-mg-task</artifactId>
223
                     <version>${project.version}</version>
224
                 </dependency>
225
                 <!-- jeesz 电子商务业务jar -->
226
227⊖
                 <dependency>
228
                     <groupId>com.sml.sz</groupId>
229
                     <artifactId>jeesz-core-eb</artifactId>
230
                     <version>${project.version}</version>
231
                 </dependency>
232
             </dependencies>
233
         </dependencyManagement>
234
235⊖
         <build>
            <pluginManagement>
236⊖
237⊖
                 <plugins>
238
                     <!-- maven -->
```

#### 代码如下:

```
📓 jeesz-web-admin/pom.xml 🛭
            <!-- 测试相关的业务功能包 -->
 156
 157⊖
            <dependency>
 158
                 <groupId>com.sml.sz
 159
                 <artifactId>jeesz-core-scheduler</artifactId>
 160
             </dependency>
 161
             <!-- jeesz core end -->
 162
 163
            <!-- 注入jeesz 我的收藏Dubbo服務接口 -->
 164⊖
             <dependency>
 165
                 <groupId>com.sml.sz</groupId>
                 <artifactId>jeesz-facade-bookmark</artifactId>
 166
 167
             </dependency>
 168
 169
             <!-- 电子商务的业务功能包(传统方式调用) -->
 170⊝
             <dependency>
 171
                 <groupId>com.sml.sz</groupId>
 172
                 <artifactId>jeesz-core-eb</artifactId>
 173
             </dependency>
 174
 175
         </dependencies>
 176⊖
         <build>
             <finalName>jeesz-web-admin</finalName>
 177
代码如下:
<!-- jeesz 电子商务业务jar -->
<dependency>
   <groupId>com.sml.sz
   <artifactId>jeesz-core-eb</artifactId>
</dependency>
将生成的 controller 文件 copy 到 web 项目中
```

| jeesz-facade-task [jeesz-project/jeesz-facade-task] | jeesz-framework [jeesz-project/jeesz-framework] | ieesz-project [jeesz-project] b ijeesz-service-bookmark [jeesz-project/jeesz-service-bookmark] jeesz-service-task [jeesz-project/jeesz-service-task] jeesz-utils [jeesz-project/jeesz-utils] jeesz-web-admin [jeesz-project/jeesz-web-admin] JAX-WS Web Services ১ 📆 Deployment Descriptor: jeesz-web-admin Java Resources com.sml.sz b ookmark.web 🛮 🖶 eb.web EbGlobalConfigController.java ▶ G EbGlobalConfigController gen.web D 🚠 oa.web sys.web ▶ # src/main/resources ▷ # src/test/java ▷ # src/test/resources ▶ ■ Libraries

将生成的界面文件 copy 到 web 项目中:

## 3、新建菜单并配置权限

具体配置请看我的收藏配置

#### 功能截图:
